

LexLens: Video Walkthrough Master Script

- Live Demo URL: <https://lexlens-one.vercel.app>
- Target Duration: 2.5 - 3.0 Minutes

Part 1: Introduction (0:00 - 0:25)

[ACTION] Open <https://lexlens-one.vercel.app> homepage in fullscreen.

[SAY] "Hello everyone! This is LexLens - a GenAI-powered legal document assistant designed to help people"

[SAY] "understand, compare, and navigate complex contracts before signing."

[SAY] "Legal text is intentionally dense and intimidating. LexLens gives you a lawyer-eye view of your document,"

[SAY] "highlighting risks, answering questions with verifiable proof, and preparing you for action."

Part 2: Uploading a PDF & Clause X-Ray (0:25 - 1:00)

[ACTION] Click "Analyze a Document", drag and drop 1_Residential_Lease_Agreement.pdf into workspace.

[ACTION] Show document loaded with Bates stamps (C1, C2, C3) and right-side X-Ray analysis panel.

[SAY] "Let us upload a residential lease agreement in PDF format. Everything happens with zero-retention privacy:"

[SAY] "the PDF is parsed 100% inside your browser using Web Workers, so raw files never leave your device."

[SAY] "LexLens segments the contract into addressable clauses with Bates stamp IDs like C1, C2, and C3."

[SAY] "Notice our Perspective selector: contracts are asymmetric. LexLens evaluates risk specifically from your role."

[SAY] "On the right, X-Ray marginalia breaks down clauses into plain English and flags risk levels."
